This count was strictly a beach count at noon.

A 66 - cows

Noddies spend much of daylight
roosting on sandy beach
most of these appear to be
immature birds & are scavenging
debris.

The rat population
appears to be very high!

645-25053 / SDC

Easter Id. Midway

No WT Shear activity
noted at 1900
Sooty tern colony
is near the end of
the breeding cycle
almost all chicks are
within 1 week of flying

The bulk of the
RT Tropicbirds are
fully fledged - a few
- 10% are in last down

RF Booby colony estimated
a max of 500 birds at
dark

2040 - nearly dark
Wedge-tails coming into
roost - a few Christmas
Island shearwaters noted
